EUSAIR TSG 1: tasks and meetings

Pillar 1 and its Topics

Driving innovative maritime and marine growth in the Region by promoting sustainable economic growth, jobs and business opportunities in the blue economy

Blue technologies

Fisheries and
aquaculture

Maritime and
marine
governance and
services

Italian regional priorities

| Topic del Pillar 1 | Coherence with Italian Regional Priorities <i>ref. Regions' document approved on June 12th 2014 by "Conferenza delle Regioni e delle Province Autonome")</i> | Identified priorities <i>indicative actions included in the Action Plan Pillar 1</i> |
|---|---|---|
| 1 Blue Technologies | 1.1 <i>Sviluppo di filiere grazie ad investimenti in ricerca e innovazione, di cluster dedicati al settore della blue economy, sviluppo della proiezione internazionale dei comparti e dei distretti già operanti e costituzione di sistemi, reti e strutture integrate ad elevato valore e contenuto tecnologico</i> | Macro-regional cluster development: to support the establishment of transboundary clusters on promising sectors such as green shipbuilding and new materials in order to enhance exploitation of emerging technologies and internationalization of Small and Medium Enterprises. |
| | 1.2 <i>Facilitazione accesso al credito, ammodernamento e razionalizzazione dei processi produttivi, di trasformazione e commercializzazione.</i> | Improving access to finance and promoting start-ups: boosting blue technologies requires financial resources. Improving access to funding and promoting start-ups for development and testing prototypes or ideas is crucial, as well as supporting business spin-offs from scientific research. |
| 2 Fisheries and aquaculture | 2.2 <i>Definizione di programmi, azioni e strumenti per l'integrazione delle filiere della pesca e acquacoltura con le attività correlate del territorio e progettazione di processi innovativi con particolare riferimento a: specie, tecniche di gestione e di allevamento.</i> | Diversification and profitability of fisheries and aquaculture: Sustainable and profitable fisheries and aquaculture require strengthened stakeholder involvement in the overall management, as well as improved and diversified activities. With regard to aquaculture, this may also imply developing tools for proper site management, environmental monitoring and improving quality schemes. |
| 3 Marine and Maritime services and governance | 3.1 <i>Condivisione/armonizzazione di indirizzi/regole/sistemi gestionali comuni per la tutela delle risorse ittiche con particolare riferimento a: a) fermo biologico; b) aree nursery; c) sistemi/attrezzi di pesca.</i> | Institutional capacity to harmonise standards and regulations: This action aims at improving the quality of public services and improving governance mechanisms for international cooperation. In a wide range of sectors (e.g. fishery policy, maritime spatial planning, integrated coastal management), the development of common understandings and harmonised standards and regulations as well as sharing of best practices are needed. This requires institutional capacity of the involved public bodies and stakeholders. |
| | 3.2 <i>Supporto alla creazione di piattaforme tecnologiche, promozione e rafforzamento della collaborazione tra attori del sistema scientifico, imprese, intermediari dell'innovazione e operatori del settore.</i> | Maritime skills: Working in the maritime sectors requires skills and increasingly specialized professional profiles and expertise. This actions aims at improving the levels of skills in the Region, e.g. by strengthening networks of academics, training organizations and professional organizations in the maritime sector. |

TSG 1 participants

Ministry of Foreign Trade and Economic Relations - Department of Agriculture, Food, Forestry and Rural Development

Ministry of Economy, Sector for programs and EU projects

Ministry of Productive Reconstruction Environment & Energy. Implementing Authority for the Fisheries & Maritime O.P.

Ministry for Economy, Infrastructure, Maritime Affairs & Tourism - Special Service for Strategy and Evaluation of Development Programs

Ministry of Agriculture, Food and Forestry -Department for competitive policies, quality agri-food and fisheries, Directorate General for Maritime, Fisheries and Aquaculture

Ministry of Agriculture and Rural Development

Ministry of Environment

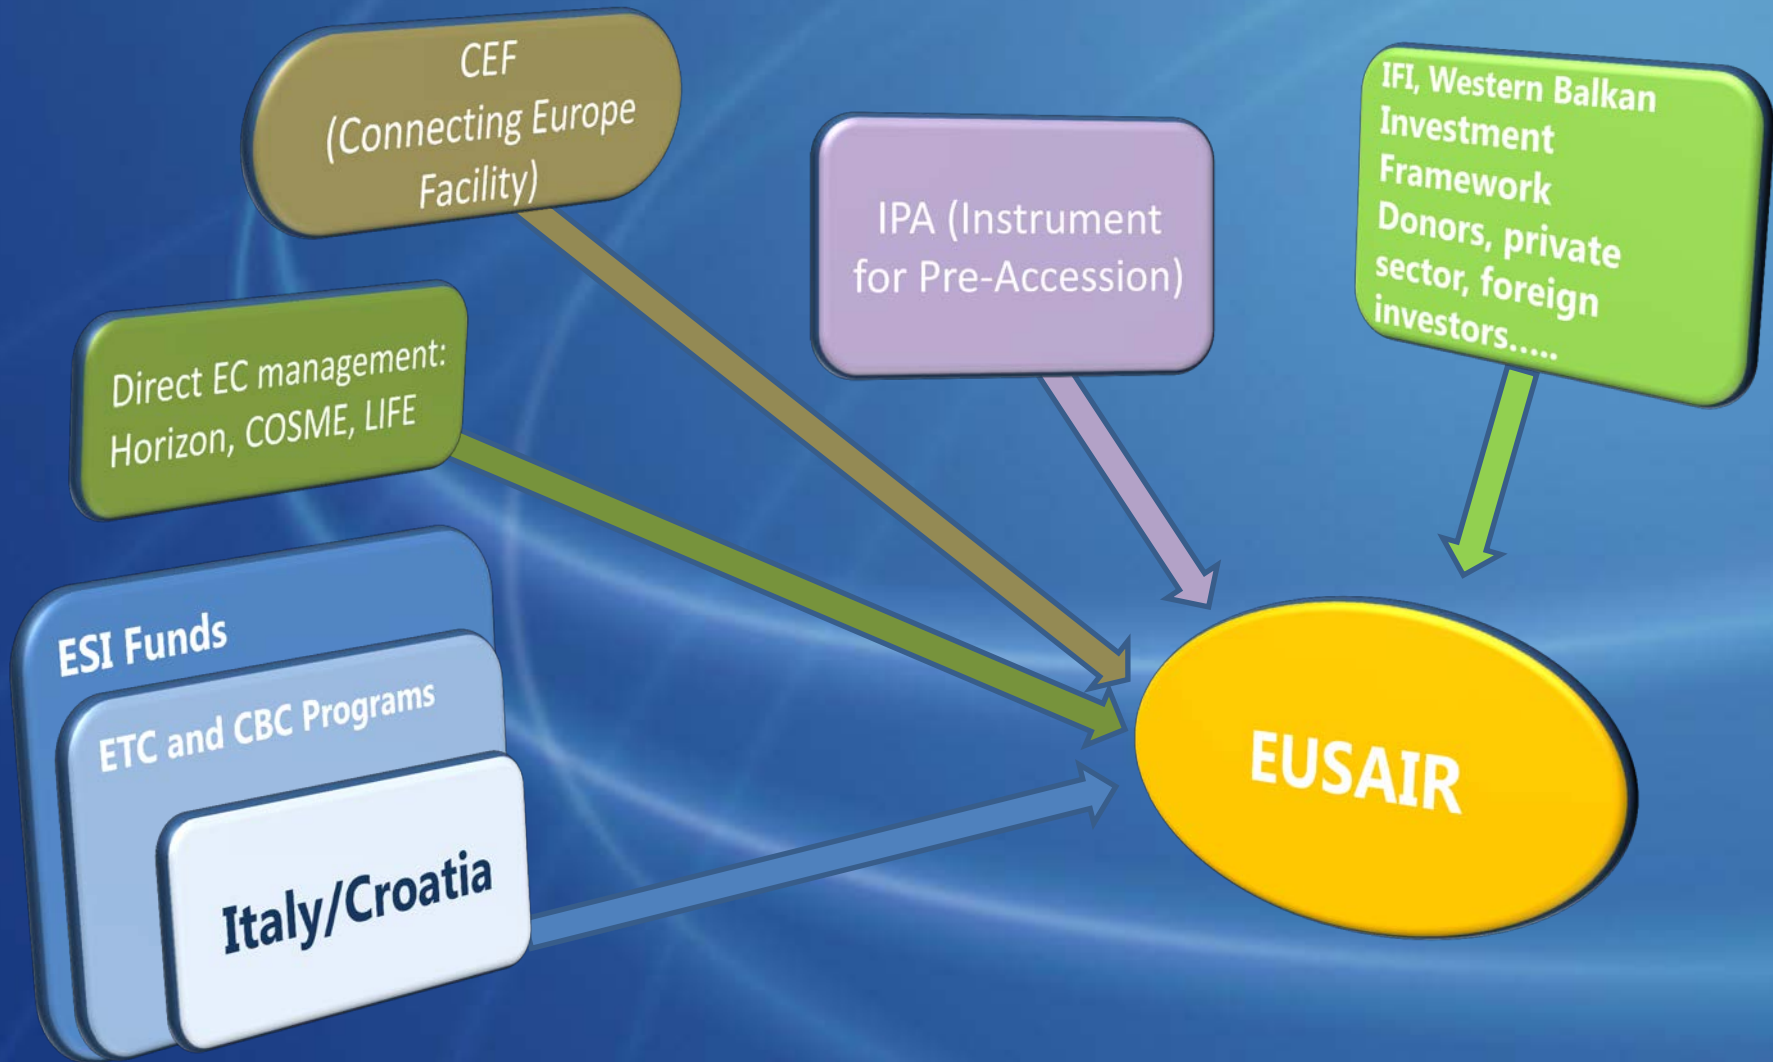

ETC and CBC Sections

European Commission – DG Maritime Affairs and Fisheries – Mediterranean and Black Sea

European Commission DG Regional Policy

Possible financial supports

TSG 1 keywords

- Setting themes and priorities promoting maritime focus
- Steering EU and non-EU funding to maritime economy
- Clustering among business, research and government actors
- Linkage with the stakeholders and Managing Authorities
- Monitoring the alignment with the strategy
- Improving human capacities and maritime skills

Italy Croatia CBC Programme 2014-2020 and EUSAIR
